

CARRIER SERVICES AUDIT

Common Challenges

Billing does not match contracts.

Cancelled services are still being billed.

Hidden cost escalators such as minimum revenue commitments and shortfalls.

Redundant features.

Missing discounts or credits earned.

Tax and tariff errors.

Pricing overcharges.

Unnecessary and unused services.

We're here to help!

Gain Savings and Clarity

Do you know where every penny of your telecom budget goes? We didn't think so. You're not alone. Finding the time and resources to dig through carrier bills can be challenging, but it's a rewarding effort.

Catalyst Group's Audit and Expense Management experts say:

- It's possible that telecom ranks among your top expenses.
- Yet telecom bills are difficult to understand.
- And nearly 20% of these bills contain errors.

Our risk-free carrier audit helps identify waste, increase efficiency, and reduce voice, data, and mobility costs, producing average annual savings of 10%-30% without changing carriers. Best of all, there are no costs unless our auditing team finds savings. The project is funded only on a percentage of what we find, save, and recover with no upfront costs.
